Conditions to be provided by the customer:

POWER CABLE: 400V / 2 x 2.5 mm² wire gauge, 3 x 16 Amp C-type fuse, 2 meter length, equipped with 400 volt 16A-6p-6h IP44 female connector. Your sauna will be supplied with the corresponding compatible connector, facilitating a hassle-free and secure electrical connection.

FOUNDATION: Flat and solid; a reinforced concrete slab, matching the dimensions of the sauna, with a thickness of 15 cm, the sauna is set on adjustable feet for leveling and alignment.

INSTALLATION: Accessibility to the installation site for crane delivery must be checked and ensured. **IMPORTANT:** It is the customer's responsibility to arrange for the crane or other delivery means and to clarify all requirements for installation in advance.

DELIVERY & ASSEMBLY: The sauna is prefabricated in the factory and is delivered directly to the construction site by prior arrangement. Generally, the customer is responsible for organizing all installation measures unless otherwise agreed. Final assembly, including electrical connection for testing, commissioning, functional testing, training, and handover will be carried out by the seller's or manufacturer's assembly team.
